

The International Maritime Transport and Logistics Conference

Marlog 11

“Towards a Sustainable Blue Economy”

Prof. Dr. Burkhard Lemper

Managing Director of Institute of Shipping Economics and Logistics (ISL)

current President of the Global Shipping Think Tank Alliance (GSTTA)

Professor at the Bremen City University of Applied Sciences

Prof. Dr. Burkhard Lemper is Managing Director at the Institute of Shipping Economics and Logistics (ISL), Bremen, Germany and Professor for Maritime Economics/Operations at the Bremen University of Applied Sciences. In January 2022 he was announced to be the President of the Global Shipping Think Tank Alliance, one of the co-organizers of Marlog 11. In his career of more than 29 years he has managed a wide variety of projects for individual national and international clients in the maritime industry, especially for port authorities, ship yards and shipping companies. He has worked on studies for the German Ministries of Transport as well as of Research and Technology, dealing with developments in the European and world wide transport markets, especially container transport, port development projects and feasibility studies including cost benefit analyses. He has written and published especially on maritime sector issues. Other important aspects of his research are cargo flow and market analysis, simulation of cargo flows and transport modeling. In recent years the focus of projects Dr. Lemper was engaged in, included also aspects of emissions, alternative fuels and other environmental aspects.
