

## The International Maritime Transport and Logistics Conference Marlog 12

### Innovative Technologies for Ports and Logistics Towards a Sustainable Resilient Future

## Luis Núñez Vera

European Affairs Manager, Port of Algeciras,  
Spain.

Luis Núñez is currently the Manager of European Affairs of the Algeciras Bay Port Authority. He is a civil engineer and has several specialized master's degrees in logistics, among other academic backgrounds. With 15 years of experience, he has participated in various international projects such as the Haramain High Speed Railway in Saudi Arabia and HS2 in the United Kingdom, among others.

In the last 4 years he has worked on the European directives of FIT FOR 55 to apply new technologies and regulations in the Port of Algeciras, to reduce GHG emissions derived from maritime port activity.

Luis is also a spokesperson for the Atlantic Rail Freight Corridor Terminal Advisory Group, vice chair of the Sustainable Business Development Committee at Medports, member of the Sustainable Committee and Intermodal, Logistics and Industry Committee at ESPO and member of the CLIMA & ENERGY Technical Committee at IAPH.
