

## The International Maritime Transport and Logistics Conference

Marlog 13

Towards Smart Green Blue Infrastructure

### Mr. Stefan Cassimon

Director

Port of Antwerp-Burges  
International

Belgium

Stefan Cassimon's experience covers all aspects of port logistics, from warehouse operations to maritime forwarding. His specialty lies in projects relating to development of sustainable and highly efficient supply chains in the maritime industry and the dry ports concepts, this from a technological point of view as well as operational point of view. Throughout his career, he has continuously been working on the quality, safety and environmental aspects of operations. His experience, amongst others, as a commercial manager and as a general manager illustrates clearly that Stefan has acquired a true understanding of the maritime business and the main business drivers of the involved stakeholders and partners.
