

**Impacts of the Fourth Industrial Revolution on Port-City Integration
“World Port Sustainability Program Aspects”**

Dr. Boris Svilic

Full Professor

Faculty of Maritime Studies, University of Rijeka, Croatia

Boris Svilic received the diploma in electrical engineering (5 year curricula) from the Faculty of Electrical Engineering and Computing, University of Zagreb, Croatia, in 1999. Master of science and doctorate of science degrees in electronic engineering he received from the same institution in 2003 and 2008 respectively.

He is currently a Full Professor with the Faculty of Maritime Studies, University of Rijeka, Croatia. Before employment at the University in 2005, he worked as Information System Security Officer at a leading bank in Croatia (1999-2005). At the University, he served as Vice-dean for scientific research work (2013-2016) and was Head of Department of Marine Electronics and Communications (2009-2010). He is currently Head of the doctoral (PhD) study program module Electronics and Maritime Communications. From 2010 to 2011, he was working as a visiting Postdoctoral Research Fellow at the Institute for Integrated Micro and Nano Systems, University of Edinburgh, UK.

His current research focuses on maritime cyber security and shipboard cyber-physical systems. He has been involved as a leader and member in several national and international research projects. He has authored over 60 scientific articles, served as the reviewer for more than 50 scientific journals and conferences, and delivered 4 keynote presentations at international conferences. He was the main Program Editor of 3 international conferences and program committee member of more than 20 international conferences. Currently, he serves as the permanent Program Editor-in-Chief of the International Association of Maritime Universities Conference. He has been editorial board member of 2 scientific journals and currently he is Editor of IAMU Section of the WMU Journal of Maritime Affairs.
