“Towards a Sustainable Blue Economy”

Joachim Verheyen

Consultant, Port of Antwerp International / APEC

Joachim Verheyen has a project management background around the topics of renewable energy, composites engineering and energy transition. He holds a masters degree in chemical engineering with a specialization in sustainable chemistry and holds a postgraduate degree in innovation and entrepreneurship. After successfully completing a production improvement project, he was certified as Six Sigma Green Belt. As manager of the Belgian solar car racing team, he won prizes at international racing events in Australia and Chile.
