

The International Maritime Transport and Logistics Conference

Marlog 11

“Towards a Sustainable Blue Economy”

Name: Frank van der Meulen

Job Title: Associate Professor of Integrated Coastal Zone Management

Brief profile of Frank van der Meulen

Associate Professor of Integrated Coastal Zone Management (emeritus), UNESCO-IHE and Deltares, Delft, The Netherlands.
Visiting Prof. World Maritime University/WMU, Malmö, Sweden

Frank van der Meulen Phd, MSc. has more than 35 years of experience as landscape ecologist in multidisciplinary applied research and management of coastal lowlands, in various climatic regions of the world. Until his retirement, he was Associate Professor of ICZM/Integrated Coastal Zone Management at UNESCO-IHE International Institute for Water Management and at Deltares, both situated in Delft, The Netherlands. He has a long University experience (Universities of Amsterdam, Delft, Cape Town and Ankara) as well as Government experience (Dutch Ministry of Water Management, South African Ministry of Land and Agriculture). Besides many articles and advisory reports, his publication record includes: guest editorships, editor-in-chief (J.Coastal Conservation) and membership of editorial boards (USA and Europe). He was the founding father and stimulus of two international foundations for coastal science and management (European and Mediterranean). Presently he is lecturing at the World Maritime University/WMU in Malmö, Sweden.

Keywords for his experience are: coastal science and management; climate change and adaptation; integrated coast management; environmental monitoring, evaluation and prediction; stakeholder participation.
